## Professional Summary

Aspiring to join an innovative team that encourages career advancement and skill development, while delivering high-impact web solutions.

## Work history

### SR. LARAVEL DEVELOPER

JULY 2024-PRESENT

#### Kalathiya Infotech

- Develop and optimize dynamic web applications using Laravel and modern backend technologies.
- Collaborate with frontend developers to integrate APIs, ensuring seamless communication between the frontend (HTML, CSS, Bootstrap, Laravel) and backend services.

### LARAVEL DEVELOPER

JAN 2024 – MAY 2024

#### Artoon Solution

- Integrated MongoDB for efficient NoSQL database management, enhancing data storage, retrieval speed, and scalability across web applications.
- Developed and implemented secure payment systems using Stripe API, supporting seamless transactions, recurring billing, and subscription-based services

### PHP DEVELOPER

AUG 2022 – DEC 2023

#### Maven Infotech

- Developed Laravel-based web applications, focusing on robust backend logic, efficient database interactions, and RESTful API development.
- Created and customized WordPress themes and plugins to align with client specifications, enhancing functionality and user experience.
- Maintained Joomla-based CMS platforms, ensuring smooth content updates, plugin integration, and optimal site performance

## Education

### S.S.C

2017

Shree Sadguru Vidyalaya (GSEB)

### H.S.C

2019

L.P Savani High School

### BACHELOR OF COMPUTER APPLICATION

2022

Veer Narmad South Gujarat University

---

## Key Skills

- Javascript
- Laravel
- PHP
- JQUERY
- Payment gateway (Paypal / Stripe)
- Vue Js
- Team work
- Github
- MySQL
- Google Cloud VPS Hosting
- REST & JSON APIS

---

## PROJECTS

### RESTAURENT MANAGEMENT SYSTEM (LARAVEL)

- Built a scalable Restaurant Management System using Laravel RESTful APIs, featuring modules for orders, menus, reservations, and user roles (Admin, Staff, Customers). Integrated role-based access control, authentication (Sanctum/Passport), real-time order status updates via Socket.IO, and deployed the system on Google Cloud Platform for high availability.
- Designed and optimized a relational database using Laravel migrations and Eloquent ORM, ensuring data integrity through request validation, secure API practices, and scalable architecture including versioning, error handling, and future-ready enhancements.

### HOTEL MANAGEMENT SYSTEM (LARAVEL)

- Built a flexible admin dashboard for managing hotel operations, including rooms, halls, pricing tiers, seasonal availability, and amenities.
- Implemented discount coupon tools to boost guest engagement and support marketing campaigns.

### BOX PACKAGING (WORDPRESS)

- Developed a custom WordPress theme with WooCommerce integration, supporting responsive design, dynamic pricing, and product customization.
- Implemented reviews, ratings, and SEO optimization, enhancing user experience, performance, and search engine visibility.

### RENT GHAR (LARAVEL)

- Developed Rent Ghar using Laravel RESTful APIs, enabling property listings, bookings, and secure role-based access for Admins, Property Owners, and Tenants.
- Integrated social logins (Google/Facebook), payment gateways (PayPal/Stripe), and secure file uploads for property images and documents with Sanctum-based authentication.
- Designed scalable database with Eloquent ORM, implemented validation, error handling, and deployed on GCP for high performance and reliability.
