Shree Sadguru Vidyalaya (GSEB) • Percentage: 70.80
- Percentage: 70.80

H.S.C   2019
L.P Savani High School • Percentage: 72.21
- Percentage: 70.80

Bachelor Of Computer Application   **2022**
Veer Narmad South Gujarat University
- CGPA: 8.10

KEY SKILLS

- Laravel
- PHP
- WordPress
- JQUERY
- Payment Gateway (PayPal / Stripe)

- GitHub
- Google Cloud VPS Hosting
- Laravel Cloud
- REST & JSON APIs

PROJECTS

Restaurent Management System (Laravel)

- Developed a scalable restaurant management system using Laravel RESTful APIs for orders, menus, reservations, and users.

- Integrated real-time order status updates using Socket.IO for Admin, Staff, and Customer roles.

- Deployed the application on Google Cloud Platform (GCP) ensuring uptime and performance.

- Implemented role-based access control: Admin (full control), Staff (order processing), Customer (ordering & tracking).

- Designed efficient relational database schema using Eloquent ORM and Laravel migrations.

- Secured APIs using Laravel Sanctum for token authentication and robust request validation.

Hotel Management System (Laravel)

- Developed an admin dashboard to manage hotel assets including rooms, halls, and reservations.

- Designed advanced room type configurations with seasonal pricing, amenities, and occupancy rules.

- Integrated discount campaigns and coupon generation for marketing and promotions.

- Used Laravel Eloquent for modelling hotel, room, and booking relationships.

- Applied role-based views for Admins and Staff to manage operational activities.

- Ensured secure and validated booking forms with proper user feedback and API handling.

Box Packaging (WordPress)

- Built a custom **responsive WordPress theme** aligned with the client's brand

identity.

- Integrated **WooCommerce** for product ordering with dynamic pricing logic based on size, material, and customization.

- Enabled product reviews and star ratings directly on product pages.

- Customized checkout and cart experience for better usability and conversion.

Rent Ghar (Laravel)

- Designed and developed Rent Ghar, a Laravel-based rental platform supporting listings, bookings, and user roles.

- Implemented role-based access for Admins, Property Owners, and Tenants with tailored permissions.

- Integrated OAuth login with Google and Facebook for seamless user onboarding.

- Added Stripe and PayPal APIs for secure rental payments and transaction history.

- Enabled property listing with image/document uploads and protected access via Sanctum tokens.

- Deployed on Google Cloud Platform, ensuring scalability, secure file storage, and high performance.
